

BENCHMARK®

20 YEARS OF EXCELLENCE

Electric Water Heater

Quality at the forefront of **Technology**
Safety features you can **Trust**
Service you can count on

Benchmark excels in providing simple installations to customized Water Heating Solutions to discerning buyers.

Be it Heat Pump, Gas, Solar or Electric an amalgamation of technologies.

No wonder why our customers **Trust Us** when it comes to providing Hot Water Solution.

Setting new quality standards

Adjustable Capillary Thermostat and Cutout*

Adjustable Capillary Thermostat with high accuracy and precision to regulate water temperature upto 75°C to optimize Energy Consumption. A secondary protective device fitted on all water heaters to cut off the electrical heating in case of excessive high temperature with "Manual Reset" to avoid any hazardous situation.

Glass Coated Inner Tank*

Unique Glass Coated Inner Tank made from 2mm thick steel and Glass Coated by baking process at 860°C to withstand high water pressure and prevent corrosion.

Heating Element*

In water heaters, the heating element is made from a special alloy, incolloy, which prevents scale formation and corrosion for a longer period of time, especially in areas with hard water.

PUF Insulation*

All water heaters are insulated with Polyurethane Foam (PUF)

4 in 1 Multi Function Safety Valve*

All water heaters are fitted with a versatile safety valve with four functions- pressure release, non return, anti vacuum and drainage - to make them the SAFEST water heaters in the market.

High Pressure Tolerance*

All water heaters are designed to with stand the water working pressure upto 8 Bars, make them ideal for high rise buildings and pressure pump applications.
